

AXIAL FLOW FANS

MEMBER

Quality Speaks For Itself

TUBE AXIAL FLOW FAN

TUBE AXIAL FLOW FAN is a type of mechanical fan that moves air or gas along the axis of rotation. It is one of the most commonly used fans in various industrial, commercial, and residential applications due to its ability to efficiently move large volumes of air with relatively low resistance.

FIRE RATED AXIAL FLOW FAN

Temperature Endurance:

FIRE-RATED AXIAL FLOW FAN are designed to operate in environments with temperatures as high as **250°C to 400°C** (Maximum operation **upto 2 hours**) depending on the applications. Common standards include the European standard (EN 12101-3)

VANE AXIAL FLOW FAN

VANE are strategically positioned to guide the air moves in a specific direction, improve efficiency, and reduce turbulence.

TUBE AXIAL FAN (ONE SIDE SILENCER)

A Tube Axial Fan with a one side silencer is an efficient air-moving device specifically designed for applications requiring high airflow rates with minimal pressure loss and reduced noise levels. These fans are constructed with an axial flow design, where air moves parallel to the shaft, offering a compact and streamlined solution for ventilation and exhaust systems.

TUBE AXIAL FAN (BOTH SIDE SILENCER)

A Tube Axial Fan with silencers on both sides is a high-performance air movement solution engineered for applications that demand efficient airflow along with maximum noise reduction. Designed to move air in a straight axial path, these fans are ideal for ducted ventilation systems where space efficiency, airflow capacity, and acoustic control are critical.

Axial Flow Fan (Operation & Maintenance Manual)

The intention of this brochure is to introduce you to, and acquaint you with the capabilities of the HUMIDIN organization in the offered product areas. It will not answer all your immediate questions, and indeed, it will no doubt raise others. We welcome your interest in our products and shall be very pleased to provide further information.

GUARANTEES

HUMIDIN guarantees its products to be free of defects in materials and workmanship for a period of one year from the date of delivery from the factory, provided motors are properly installed with overload protector. Humidin agrees to repair or replace defective parts or part to be returned to the factory, all transportation charges prepaid. Humidin does not guarantee against abrasion, corrosion or erosion. Humidin shall not be held responsible for any charges in connection with the removal or replacement of alleged defective equipment nor for incidental consequential damages
